PLAIN / PLAIN-L AF Risk Report

Date: 03 November 2025

Patient Name: saharat

HN: 5678

Model used: PLAIN

Total Score: 9

Risk Category: Likely AF

Interpretation: High risk of new-onset AF. Consider prolonged ECG monitoring (≥ 72 h).

This score estimates the risk of new-onset atrial fibrillation following stroke.

Based on the PLAIN / PLAIN-L models (Neurological Institute of Thailand).

Cut-off ≥ 4.5 indicates 'Likely AF'.

Validation: AUC = 0.892, Sensitivity = 98.9%, Specificity = 73.8%.

Clinical advice: Consider ECG or Holter monitoring for high-risk patients.
